

“for allowing said implement to move side-to-side with respect to said support frame.” Without the slot slidably receiving the locking pin, the sliding movement cannot be achieved. Without the slid substantially transversely receiving the locking pin, the sliding also cannot be achieved. These are significant features of the present invention and are included within both independent Claims 1 and 11 of the present application.

viii. *Burton Does Not Teach an Actuator Unit (Claim 11 Only)*

Independent Claim 11 has the same features as independent Claim 1 with the addition of “***an actuator unit attached between said support frame and said implement unit for applying a side-to-side force to said implement unit.***” The Official Action does not address this feature that was contained within the original Claim 11 of the application and the Applicant is unable to locate any similar structure within Burton. The Applicant respectfully submits that Burton does not disclose or suggest the usage of “***an actuator unit attached between said support frame and said implement unit for applying a side-to-side force to said implement unit.***”

ix. *Burton Does Not Anticipate Claims 1 and 11*

The Applicant respectfully submits that Burton does not qualify as appropriate prior art under 35 U.S.C. §102(b) as Burton does not disclose (expressly or inherently) all of the elements of independent Claims 1 and 11.

D. CONCLUSION

In light of the foregoing amendments and remarks, early reconsideration and allowance of this application are most courteously solicited. Should the Examiner consider necessary or desirable any formal changes anywhere in the specification, claims and/or drawing, then it is respectfully asked that such changes be made by Examiner’s Amendment, if the Examiner feels this would facilitate passage of the case to issuance. Alternatively should the Examiner feel that a personal discussion might be helpful in advancing this case to allowance, they are invited to telephone the undersigned.

Respectfully submitted,

Michael S. Neustel (Reg. No. 41,221)
